

Pelletier Construction Group Web Platform

Lars Swenson - Project Manager | Joy Zhang - Lead Developer

PROJECT OVERVIEW

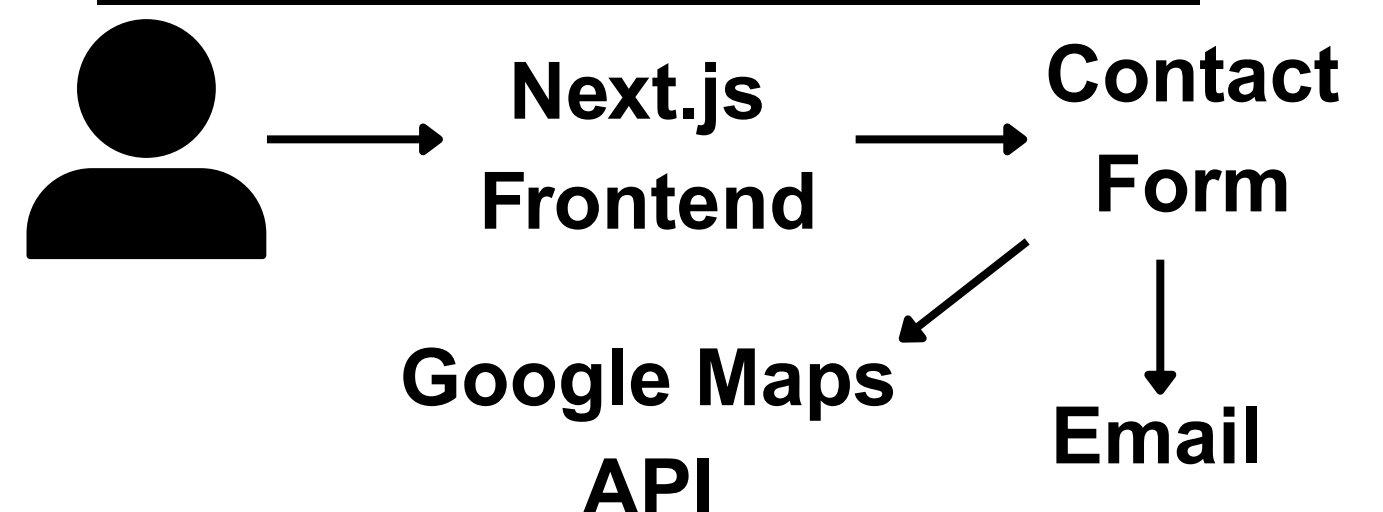

Pelletier Construction Group is a Seattle-based remodeling company focused on high-quality design and craftsmanship. Our team rebuilt the company's outdated website using modern tools to improve usability, visual clarity, and mobile responsiveness. The redesigned platform enables customer engagement, estimate submissions, and showcases pre-approved DADU designs to support Seattle's permitting process. This project bridges business goals and development practices in a real-world client scenario.

KEY FEATURES

- Portfolio Gallery: Interactive modals with photo carousels of remodels.
- ADUs: Modal viewer for Cedar Cottage designs with day/night renderings, floor plans, and cutaway diagrams.
- Google Maps Integration: Embedded responsive map for project location visibility.
- Estimate Request Form: Simple form with required field validation, routing to client email.
- Testimonials Page: Carousel layout showcasing client feedback.
- Mobile-Responsive Layout: Tailwind utilities for multi-device compatibility.
- SEO Optimization: Clean routing, meta tags, and performance tuning.
