

Shift App

Smart Scheduling for Institutions

Recent Progress

The development team has made significant strides in enhancing the Shift App. Key achievements including a fully mobile-optimized shift creation process improved visual feedback on scheduling progress, and stabilization of application navigation.

Ongoing efforts focused on ensuring a reliable and user-friendly experience.

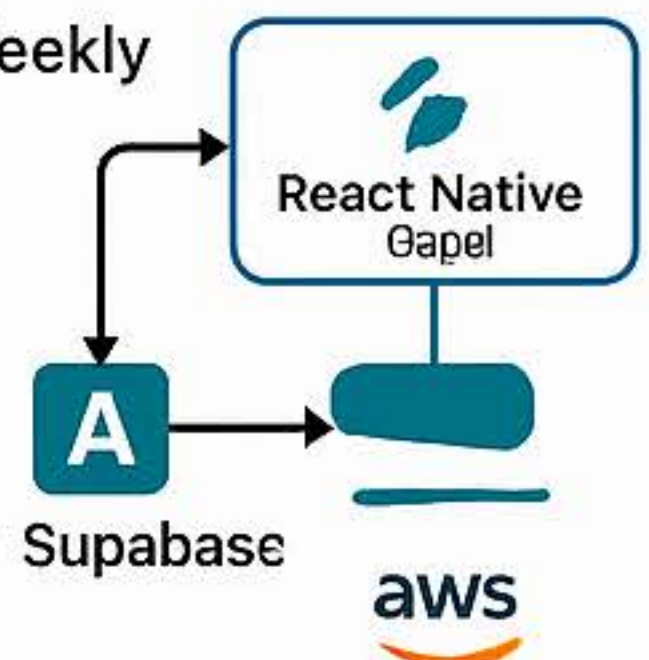

Developed by Miguel Quintana

Project Overview

Shift App is a scheduling application designed for institutions, offering a streamlined and mobile-optimized experience for users to customize weekly schedules, and selecting and user-friendly experience for a stable and user-friendly experience.

Detailed Key Features

- Customizable Weekly Schedules
- Enhanced Shift Creation (Mobile-First)
- Visual Schedule Progress
- Shift Swapping Options
- Reliable Navigation
- Time-Off Request Management
- Secure Authentication

Recent Progress

The development team has made significant strides in enhancing the Shift App. Key achievements include a fully mobile-optimized shift creation process, and stabilization of application navigation.
