Bachelor of Science Degree (BS)
Computer Science

Program Planning Sheet (Scope & Sequence)

The BS in Computer Science degree will cover a wide range of critical knowledge and skill-building areas including, the design and usability for software and computing systems, effective team collaboration, information technology leadership and preparation for advanced learning in computing, science, engineering and other professional fields.

Computer Science degree graduates will be able to obtain positions related, but not limited to:

- Software Developer
- Software Quality Assurance Analysts and Testers
- Web Developers and Digital interface Designers
- Computer Systems Analyst
- Network and Computer Systems Administrators

Prerequisites: Prerequisites are classes that prove eligibility by testing out of a class or having satisfied prior course work. Course work earned at other institutions must be unofficially evaluated or approved by a program advisor or faculty before registering. Courses in this degree with pre-requisite requirements are marked with an (*). View course details for more information.

Prerequisites for BS CS Admission:

- Applicants must have an associate degree (or equivalent credits) from a regionally accredited institution with a minimum cumulative 2.5 GPA and a 2.5 GPA or higher in all CS pre-requisite courses. Any General Education Requirements taken as part of the associate degree can be transferred into the requirements below.

- The following courses are prerequisites (equivalent courses may be substituted):
